ABOUT ME

Results-driven React.js developer with over 1 year of industrial experience and a strong foundation in advanced JavaScript. Proven expertise in frontend development, with a focus on creating dynamic and delivering best user experience.

EDUCATION

- **12th Science, Hanmantrao chate jr. college**
June 2018 - Feb 2019, Kolhapur. Grade- 80.00 %
- **B.Tech in C.S.E, KIT's colleg of enigneering**
June 2019 - July 2023, Kolhapur. CGPA- 8.45

SKILLS

- JAVASCRIPT
- NODE.JS
- REACT.JS
- REDUX Toolkit
- MySQL
- C++

EXPERIENCE

Associate Consultant Engineer, Hoonartek

August 2023 - Present (Serving Notice Period)

- Built user interfaces using React.js and Material-UI.
- Optimizing UX and Slashed codebase by 50% via optimization & refactoring, boosting efficiency & maintainability.
- Streamlined data retrieval through efficient SQL queries.
- Modernized codebase to ES6 standards, future-proofing & streamlining development.

TECH - React.js, SQL, Material Ui, CSS.

Software Engineer, Bentley Systems

Jan 2023 - July 2023

- **Frontend Development:** Developed a React.js and Node.js web app that increased user engagement by 25% by maximizing API data utilization.
- **Backend Development:** Implemented a dynamic request-handling feature in TypeScript backend, reducing response times.
- **Unit Testing:** Increased test coverage by 80% with comprehensive TypeScript unit tests using Jest, Chai, and other industry-standard libraries, improving code reliability and performance.
- **Bug Resolution:** Identified and resolved critical region-related bugs and actively participated in LDFlag-related work.

TECH - TypeScript, React.js, Redux, Node.js, Azure DevOps

PROJECTS

VoiceTube | [Website](#)

React.js, JavaScript, NodeJS, ML using Javascript, MongoDB

- Full-stack web application powered by a collaborative filtering recommender engine, suggesting songs tailored to user preferences.
- Dual recommendation modes: Profile-based recommendations and mood-based recommendations.
- Add/remove songs to your favourite tracks by assigning them ratings.

Art Gallery Management | [Website](#)

React.js, Javascript, MySQL Database Server

- A full-stack web application that efficiently manages art exhibitions.
- Users can purchase any piece of art from an exhibition within an art gallery, selecting paintings based on their ratings, prices, and quality.
- The admin can add, update, or delete any piece of art from any exhibition.

Honars & Certificate

- 176 Global Rank in June CodeChef Starters 2021
- 3 STAR at CodeChef with the highest rating of 1689
- AIR 587 in TCS Codevita round 1 season 10
- 2nd Runner-up of 'Circuit Gyan', an Inter-College Coding and Debugging Contest.
